INTERNATIONAL YOUNG INVESTIGATOR AWARD

“Franco Maria Montevvecchi”

18 December
2018

Auditorium
Energy Center
Politecnico di Torino

Via Paolo Borsellino 38

At 1.00 PM

The International Young Investigator Award “Franco Maria Montevvecchi”, promoted by Prof. Montevvecchi’s Family, Politecnico di Torino, and Fondazione CRT, is dedicated to the memory of Prof. Franco Maria Montevvecchi, one of the most brilliant minds of the Italian Bioengineering community and Coordinator of Biomedical Engineering School and Doctorate at Politecnico di Torino from 2004 to 2012. The award aims to acknowledge the outstanding contribution of a Young Investigator to the advancement in the field of Bioengineering.

1.00 PM Welcome

Guido Saracco

Rector of Politecnico di Torino

Massimo Rossetto

Head of Department of Mechanical and Aerospace Engineering, Politecnico di Torino

1.10 PM Presentation of the International Young Investigator Award “Franco Maria Montevvecchi”

Alberto Audenino

Director of Polito^{BIO} Med Lab, Politecnico di Torino

Department of Mechanical and Aerospace Engineering, Politecnico di Torino

1.30 PM Keynote Lecture

“The role of hemodynamic changes on endothelial cell dysfunction”

Andrea Remuzzi

Head of Department of Biomedical Engineering, Mario Negri Institute
for Pharmacological Research

Department of Management, Information and Production Engineering,
University of Bergamo

2.00 PM Awarding of the Prize

Mila Bertinetti Montevvecchi

2.10 PM Winner’s Lecture

“Personalized computational hemodynamic simulations
in cardiovascular diseases”

Muhammad Owais Khan

Department of Pediatrics, Stanford University

Light refreshments will be served at the end of the ceremony.
