2-day Case-Solving Event with **FEV**

Turin | Energy Center - Politecnico di Torino | 27-28 September

Description:

The Energy Center, FEV, and the CommUnity by InnoEnergy are teaming up to bring you this 2-day case-solving event!

Participants from varied backgrounds in academia and industry will work together to address challenges facing the energy and mobility transition. At the end of the event, teams will pitch their ideas to FEV and a panel of judges. The winning team will get some great prizes from the sponsors!

This is a great opportunity for networking with innovative and passionate people in a fun environment!

The Challenge:

New services, efficiency improvements and related business models enabled by small autonomous shuttles for urban logistics in waste management.

→ Is there a place in the new business for an engineering service provider?

PRIZES:

Winning team will be interviewed for internship/thesis opportunities with FEV
First 10 people to register get InnoEnergy goodies!

Space limited.

Registration required.

11:30 – Group Work
13:00 – Lunch
13:40 – Group Work ctd
14:10 – Pitch Preparation
15:00 – Pitch Presentations!
18:00 – WINNERS ANNOUNCED!
19:00 – End of event

FEV

The FEV Group is an internationally recognized powertrain and vehicle engineering company that supplies the global transportation industry through the design, analysis, prototyping, powertrain and transmission development, as well as vehicle integration, calibration and homologation for advanced internal combustion gasoline-, diesel-, and alternative-fueled powertrains as well as hybrid-electric engine concepts that address future emission and fuel economy standards. In recent years, FEV has progressively broadened its engineering portfolio and expanded its services into other industrial sectors which include other areas of transportation (marine, rail, aerospace, etc.), agriculture, defense, energy, and clean technology. FEV is strongly committed to research and innovation, participates to relevant public/private initiatives and European/Local funded projects aiming at continuously extending its know-how and capabilities on new technologies and e-mobility.

Energy Center

Since its inception in 2016, the Energy Center Initiative (ECI) aims to build national and European networks as a lever to develop new entrepreneurial activities in the energy sector, through the opportunities given by academic research, innovation and partnership. It supports and stimulates a series of actions and projects that will provide support and advice to local, national and transnational authorities on energy policy and technology.

Want to know more about the Energy Center and the pillars of the ECI? Please have a look:

InnoEnergy CommUnity

The InnoEnergy CommUnity empowers those who want to make an impact on a sustainable energy future. Everything we do, ranging from events to programmes, to the platform, is driven by a mission to empower change agents worldwide by fostering collaboration, inspiration, career opportunities and challenge solving to achieve a sustainable energy future. Activities, discussions and debates are driven by worldwide CommUnity members who come from different disciplines and share the passion to advance the energy transition.
